Matthew Rodriguez

I am a passionate developer but most importantly, I am about technology. Fast, responsive, and creative projects are what I do.

EXPERIENCE

Instacart
March 2020 - Present

- Provide technical expertise configuring Instacart's app. It allows customers to shop in the app and have someone deliver their goods to their car or home in response to COVID-19.

- Implementing new users, caching total orders, and troubleshooting network activity are some of the issues I solve.

Freelance/Mentor
January 2020 - Present

- I create websites for local clients using the best practices and techniques for all browsers and devices.

Sushi Chef / Remade Website - Gozen Japanese Restaurant
June 2017 - January 2020

- Worked with top sushi chefs during peak hours making sushi rolls, nigiri, and sashimi for one of Visalia's top rated restaurants.
- Trained employees how to efficiently and safely prepare fresh fish and other foods.
- Cut, deboned, and prepared salmon, tuna, halibut, and blue fin.
- Worked efficiently with a team in a high pressure environment.

—

- The restaurant needed a new website, I took it upon myself to create one
- Planned, designed, and executed a fully responsive and functional website
- Utilized CSS/Sass, Javascript, Bootstrap, and HTML5.
- Negotiated domain price with the past author.
- Improved SEO for current website.
- Deployed the new website with Hostgator and Cyberduck.
- Communicated with business owners frequently, implementing features according to their demands.
- Ranked as an A on Google's website tester.
